

---

designed primarily for bicycles and pedestrians. Another concern that warrants communication for Borough government is the proposed timetable for action once decisions about the project are made. Participants' preferences for the options varied. This variation is captured in the table above. A recording of the public meeting is included as Appendix H.

### **5.3 STAKEHOLDER INTERVIEW RESULTS**

Below is a brief summary of the stakeholder interview results, including the individual preferences and major concerns. The CAC presents the results without comment or opinion, because community members hold very diverse and nuanced views about the project. The interviews serve more effectively as brief glimpses into the thoughts and values of individual stakeholders, not as clear representations of what a majority of like stakeholders might believe. The full transcripts of the Stakeholder Interviews are included as Appendix I.

#### **Residents who live adjacent to the project:**

Dylan Atkins, Upper Providence
